Libby Lake, Snowy Range Mountains, WY

“ I wish I had thought of such a simple solution to a serious problem!”

Judd Cooney

Author/Outdoor Writer

“This product works so well and we had no meat loss due to insects.”

John Sloan

Author/Outdoor Writer

Liquid Game Bag is a product specifically produced for the great outdoorsman who has ever lost any game meat due to the flies, insects, and yellow jackets. Liquid Game Bag makes the exposed areas of the meat less attractive for insects and flies lessening the odors of decay, and producing an unstable state for insects laying eggs, while at the same time providing a protective non-toxic coating that seems to act as a temporary preserving agent for the meats of wild game, fish, and fowl.

Roger, Ken and Paul King Hunting in Labarge, Wyoming

Liquid Game Bag has been proven to be 100% effective, easy to use, and offers a money back guarantee to anyone who is not completely satisfied. North American Hunting club has field tested and approved Liquid Game Bag, and Outdoor Life Magazine along with numerous guides and hunters attested to the quality and effectiveness of Liquid Game Bag from personal experiences while hunting. Even under extreme temperatures that reach as high as 105 degrees F, in places such as New Mexico and Central African Republic, Liquid Game Bag has passed several tests of effectiveness.

When Using **Liquid Game Bag**, No additional protection is needed. There is no other product on the market that is

an equivalent substitute, not even the mesh cloth bag. The mesh cloth bags can be awkward to put on the animal, and have been known to over-stretch if pulled too hard. That leaves an opening for the flies and insects to enter and attack your meat. Cloth bags can also tear when caught by branches or underbrush located in the area, and the cloth bag does not prevent exposed meat from drying out.

Liquid Game Bag

Has been inspected and approved by the Wyoming Department of Agriculture in

compliance to the Food and Drug laws and regulations. Composed of all natural US food grade ingredients, Liquid Game Bag is safe for human consumption, but leaves no unwanted taste on your meat.

Paul King Texas Goose Hunt

Liquid Game Bag can also be used repeatedly, and the unused portion of the product can be stored in a cupboard instead of being refrigerated, this eliminates the worry of wasting any remaining product.

Roger King Wyoming Mule Deer

Conclusion

Liquid Game Bag is for everyone, and has been proven to be 100% effective, even in severe weather. There is not another product on the market that can even come close in comparison with the effectiveness that is guaranteed by **Liquid Game Bag**. This product is so easy to use! It is light enough to carry in a backpack, low in cost, able to prevent game from drying out and protects your meat from harmful insects! By making the meat seem less attractive to insects there is no more throwing away pounds of ruined meat when you return home after your hunting trip. Yet at the same time, **Liquid Game Bag** leaves no aftertaste on the meat and is safe for human consumption because it is made from natural food ingredients.
